

NIPPER COMMUNITY

A WORLDWIDE NETWORK FOR INDUSTRY 4.0

The Nipper has an extensive integrator network throughout the world. All our integrators are trained and certified Nipper experts. They can quickly respond to your needs. Moreover, they speak your local language and know your local culture.

In addition, we are proud to work for a number of companies that are ranked in the Fortune Global 500. Those multinationals are also part of our extensive Nipper community.

Together with our integrators and customers, we are building a worldwide network for industry 4.0. And ensure access to high-tech products for everyone.

ALREADY ENVISION THE NIPPER ON YOUR WORK FLOOR?

Would you like to buy a Nipper or do you need some more information?

We can put you in touch with the integrator located closest to you.

MEET THE NIPPER

THE MOST VERSATILE PALLET TRUCK

The Nipper is a compact automated vehicle for unmanned internal pallet transport. It can easily lift pallets up to 1000 kg and safely navigate through narrow spaces. And thanks to our smart engineering, energy consumption is low and use of normal wear and tear parts is limited. Ensuring low maintenance and remarkably low total cost of ownership.

What's more, we allow you, our customer, to independently use our technology and experience all advantages. After training, you will be able to program the Nipper without our help. You know how to use the intelligent software to easily customize the Nipper's routes, add multiple Nippers to the program and change existing commands.

Our Nipper meets the most stringent safety requirements. High-quality safety components, such as a 360° scanner and Blue Spot, are installed to ensure the Nipper can safely navigate through manned spaces. Making it an excellent vehicle for use in a production or warehouse environment.

By deploying the Nipper on the work floor, you will save substantial amounts of money in respect of manpower and insurance. And increase productivity.

- ✓ MOST COMPACT AUTOMATED GUIDED VEHICLE FOR PALLET TRANSPORT
- ✓ SAFE TO USE IN MANNED SPACES
- ✓ NAVIGATION WITHOUT INFRASTRUCTURE
- ✓ INDEPENDENTLY PROGRAMMABLE BY CUSTOMER
- ✓ ACCIDENT AND DAMAGE PREVENTION
- ✓ MEETS ALL STRINGENT SAFETY REQUIREMENTS
- ✓ WI-FI BASED COMMUNICATION SYSTEM
